

WHY THEY BOUGHT

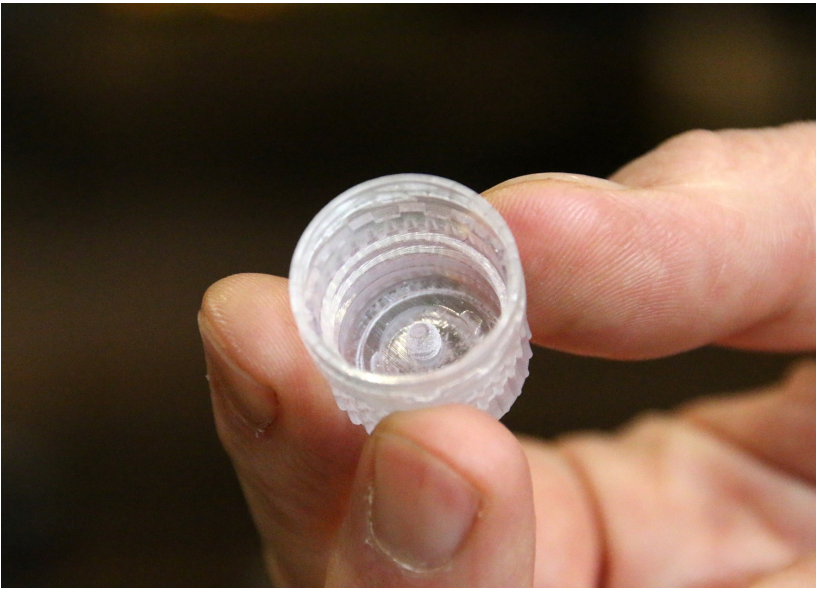

Berlin Packaging

Location	Chicago, IL
Application	A progressive, hybrid packaging company, Berlin Packaging specializes in the design of custom glass, plastic and metal containers for a wide range of food/ beverage and personal care companies, as well as manufacturers of agricultural, industrial, automotive and household chemicals.
Challenges	<ul style="list-style-type: none">— High tooling costs and long lead times for small- to medium-volume production— Need for high-precision clear parts— Need for rapid design iteration

ETEC SOLUTION

System	envisionTEC P4K
Benefits	<ul style="list-style-type: none">— Clear E-Glass material is similar to production parts— Ability to print high volume of parts and change resins quickly— High resolution and smooth surface finish reduced need for extensive post-processing— Enabled faster turnaround of prototypes for clients

“We use 3D Printing to create amazing visual models for our customers to understand what we are proposing to them. A 2D print never does justice to a 3D shape.”

Martin Rathgeber, Director of Engineering
